

ODP-81-1559
19 November 1981

MEMORANDUM FOR: Deputy Director for Administration
FROM: Bruce T. Johnson
Director of Data Processing
SUBJECT: ODP Report for Week Ending 17 November 1981

Support to OD&E and OSA

[REDACTED]

STAT

Support to OICE

CAMS (COMIREX Automated Management System). [REDACTED]
briefed the DDA, D/ODP, and Comptroller on the CAMS budget
revision proposals on 12 November. Additional funding is being
sought for the FY 82-FY 87 time period. [REDACTED]

STAT

STAT

Support to NFAC

[REDACTED] gave a briefing on array processors to the
NFAC Strategic Planning Group on Monday, 9 November 1981.

STAT

FPMR Amendment

The Management Staff distributed for comment a GSA proposal
to amend the Federal Property Management Regulations. The
amendment would require all COBOL, FORTRAN, and BASIC compilers
acquired by the government, and those used by contractors, to be
in compliance with Federal Information Processing Standards
(FIPS). [REDACTED]

STAT

SAFE

On 16 November, 32 Consolidated SAFE Project Office
representatives and consultants began the week long Phase I of
the Block 1 Preliminary Design Review at the TRW SAFE Development
Facility in Torrance, California. Held as a joint
government/contractor effort, this review is a major milestone in
the Block 1 SAFE schedule. [REDACTED]

STAT

We received final comments on the Word Processing RFP from OC. Some of their suggestions and concerns were included in a revised version. OL now has the final copies for legal review. We have already coordinated the RFP with elements of ODP, OS, IHSA, OC, and DO.

A tour of CAMS TRW space and the new Credit Union Building has been scheduled for the Director and Deputy Director of ODP on Monday, 23 November, from 1000-1200 hours.

The Director of Data Processing will present CIA longevity awards to approximately 50 ODP employees in the Headquarters Auditorium on 19 November.

A demonstration of the OTRTEST system will be given to Language School personnel on 23 November. OTRTEST is a system for scoring and creation/analysis of statistical data for language tests and language qualification data.

We will present two briefings to DDO users on the uses, features, and capabilities of PANVALET. PANVALET is a proprietary software package used to maintain libraries of applications programs on disk storage. ODP has been using this package successfully for several years and has recently made it available to computer users, like DDO, who run their own production programs.
